Social Media Toolkit

To support the #CircLean Network you can help spread the word online. To help you do so, we have written a set of standard posts for you to use on Facebook, Twitter, and LinkedIn. You can use these in English or translate them into your local language(s). Feel free to adapt them to better fit your audience.

We have provided five posts for each social media network, promoting:

- Membership in the CircLean Network
- The self-assessment tool
- The matching tool
- The reporting methodology
- The label

Ideally, we would encourage you to post one of each of these posts, and in this order. This way, you take your audience on a logical journey through the CircLean Network: get to know you/the campaign, interact with you/the campaign, take action.

For each of the posts in this document, we are also providing you with landing page URLs, visuals and social media banners. All visuals are available here: [Link](#)

The URLs provided in this document allow us to better track the campaign's performance. Please don't modify or shorten these URLs. When posting a message to social media, the URLs will be shortened automatically.

Reporting methodology

The #CircLean network ensures the establishment of structural reliable evidence reporting at EU-level for industrial symbiosis. Common standards will provide evidence for the benefits of industrial symbiosis to strengthen its role for the circular economy.

The reporting methodology is created in a joint effort by #CircLean network together with the @European Commission's DG Grow.

Curious? Take part in developing the reporting methodology 📁 <https://circlean-symbiosis.eu/reporting-methodology/>

Twitter

Always try to tag several accounts in your Twitter posts to maximise its reach.

Don't tag them in your tweet text, but in the image you upload. To do so, upload your image, click "Who's in this photo" or "tag people" directly beneath the image, and your tweet is ready to be posted.

Here's a list of interesting European accounts to tag. Feel free to add more specific organisations at the national or local level.
